

Project Title: JobMatch

1. Introduction

- We provide a platform to match potential candidates with most suitable job openings
- Recruiters will get the list of most competitive and reliable candidates over millions of profiles. Job seekers will also find their ideal jobs that match their expectations and capabilities.

2. Expected List of Features

- Recruiters: CRUD for jobs, get list of most potential candidate order by matching percentage, contact candidates.
- Candidates: CRUD for their profiles, get list of most potential candidate order by matching percentage, get report about missed skills or experience, get links to online resources to develop missed skills and experience, connect with other candidates.

3. Market Survey

- LinkedIn: huge database but no matching feature.
- Job search websites: no interaction among candidates and recruiters.
